

CACTUS GAME

Place the cactus in the centre of the players and randomly insert 10 sticks on each side into the top half of the tower in one of the holes, so that the sticks come out of the other side. Put all 20 balls in the top of the cactus so that they roll between all the sticks. Agree which player starts and play clockwise.

Each player chooses his/her own colour balls to play with. Take turns taking a stick out of the cactus and put it back somewhere else. Do this in such a way that your own colour balls fall down, and that you block your opponent's ball by tactically returning your stick back in the cactus.

THE END OF THE GAME

You win if all 5 balls of your colour roll out the cactus first.

Congratulations!
